HAVISH M
CONSULTING

Accelerate Generative AI Adoption + ROI Now

Enabling organizations to move from pilots to scalable and measurable real-world business impact

HMC ONE

A unified framework to assess, build, and scale AI capabilities across your organization

Digital Transformation | Generative AI | Data Analytics | Data Visualization | Business Intelligence | Process Automation | Workflow Architecture

1. Solution Creation: We develop innovative solutions that address specific business challenges, leveraging your deep industry knowledge and technical expertise.
2. Employee Training: Recognizing the importance of upskilling, we provide training programs to empower employees with the skills needed to harness data effectively.
3. Business Use Case Development: We collaborate closely with you to identify and create practical business use cases that maximize the value of data-driven insights.

HMC ONE

A unified framework to assess, build, and scale AI capabilities across your organization

HMC One is Havish M Consulting's flagship enterprise AI adoption framework – designed to take organizations from fragmented experimentation to structured, scalable, and measurable AI transformation.

It integrates consulting, training, and execution into a single, phased journey:

Covers leadership alignment, capability building, real use-case development, and impact tracking
Ensures AI is not just learned—but embedded into workflows and decision-making
This aligns with your core positioning of enabling **data-driven and AI-driven decision-making across all levels of the organization**

Havish M Consulting ©

HAVISH M CONSULTING

The GenAI Reality

Why most pilots stall – and how we get organizations to measurable ROI

Most GenAI pilots fail before they scale.

We've built an end-to-end system that takes organizations from baseline to measurable ROI

and we've done it **20+ times**.

20+ Engagements

Enterprise GenAI programs delivered end-to-end

Baseline → ROI

A single, phased system – not disconnected pilots

Measurable

Impact embedded in workflows and decisions

Havish M Consulting ©

HAVISH M CONSULTING

Who We Work With

Enterprise clients, spanning sectors and leadership levels

From the boardroom to the front line

Depth of engagement — we operate at every level of the client organisation

Listed companies · **₹5,000–15,000 Cr revenue** · across sectors · strategy turned into execution

Across Sectors

Manufacturing, retail, financial services, healthcare, real estate and infrastructure — our work is never confined to one industry.

₹5,000–15,000 Cr

We're built for listed companies in this revenue band, where governance, speed and scale all matter at once.

Promoters to ExCo

From founder-promoters to Boards and Executive Committees, we engage through leadership coaching, ROI discussions and steering committee reviews.

Havish M Consulting ©

Recommendations

Hear from our Clients

Kushal Sinha
Partner at Strategy&

"Havish **adapts to audience requirements** and enables the team to pick things up and run themselves. He covers **advanced analytics techniques** focusing on problem solving techniques."

Yogesh Yadav
CFO at Shell Group Entity - Sprng Energy

"Automation projects done helped us **streamline and accelerate** our workflows and enabled teams to complete **complex tasks faster**."

Giuseppe Cozzolino
ONB HR Director - Europe at Sterlite Technologies Limited

"Clear in explaining the **different problems** and **how to solve** them. Appreciate his **capability** to **follow up questions** and **immediately give a feedback** to solve the issue."

Iryna Oksiuk
PwC Private, Sales Enablement at PwC Canada

"Havish is a **great coach and trainer**. He **focuses on small details** and paces the training **adopting to the group**."

Asad Equbal Khan
General Manager – Dubai at Bahri & Mazroei Trading Company

"Insightful and engaging workshop on GenAI. The sessions helped us in **aligning our perspectives** and on leveraging AI across operations. Excited to see these insights translate into action at BMTC."

Abhinav Chaturvedi
Senior Consultant – Strategy Operations at KPMG Ireland

"Havish is **very sincere and a dynamic**, driven by his passion to learn and deep dive into the subject matter. His **analytical bent of mind** and sharp **business acumen** makes him a detail oriented and thorough professional."

GEN AI BASELINE ASSESSMENT

Establish a fact-based view of the organization's current AI maturity across data readiness, technology infrastructure, talent capabilities, and use-case adoption.

This includes benchmarking against industry standards and identifying capability gaps.

Outcome:
Clear starting point and prioritization of high-impact intervention areas.

<> Havish M Consulting

AI Integration Readiness Questionnaire (Copy)

This questionnaire helps understand the current starting point of AI awareness, digital capability, and workflow patterns across the organization.
The responses will help establish a baseline before the AI journey begins and identify areas where AI could improve productivity and reduce manual effort.

Instructions:

- Please answer based on your current experience in your role
- There are no right or wrong answers
- If unsure, select the closest option
- Short explanations are must where applicable

The questionnaire will take approximately **30–45 minutes** to complete, and your thoughtful responses will greatly help in shaping how AI can support your work and improve organizational processes.

Your honest input is highly valuable and will directly contribute to identifying opportunities to make everyday work more efficient and impactful.

When you submit this form, it will not automatically collect your details like name and email address unless you provide it yourself.

* Required

AI Awareness

1. I am familiar with Generative AI tools such as ChatGPT, Copilot, or Gemini. *

Think about whether you have heard of tools that generate text, answer questions, or create content automatically.

HAVISH M CONSULTING

GEN AI BASELINE ASSESSMENT

Executive Summary

Takeaways from the baseline survey

- **Employees are digitally ready:**

  93% are comfortable with digital tools; 82% are comfortable experimenting with AI.

- **Pain is tangible:**

  ~80% report manual-process dependence, ~75% cite repetitive work, and ~70% see rework or approval delays.

- **Usage exists but is uneven:**

  73% already use GenAI tools, yet only 61–63% clearly associate GenAI/AI with core enabling technologies.

KEY PROOF POINTS

96%
believe AI can improve productivity

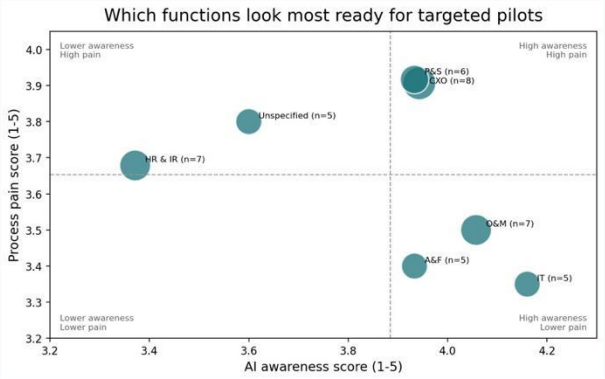

93%
comfortable with digital tools today

80%
say their teams rely on manual processes

66%
have active concerns about AI risks

Where to start: target functions that combine pain with readiness

Pilot selection should balance business friction, user readiness, and sponsorship potential

Recommended pilot logic (SAMPLE)

Priority 1

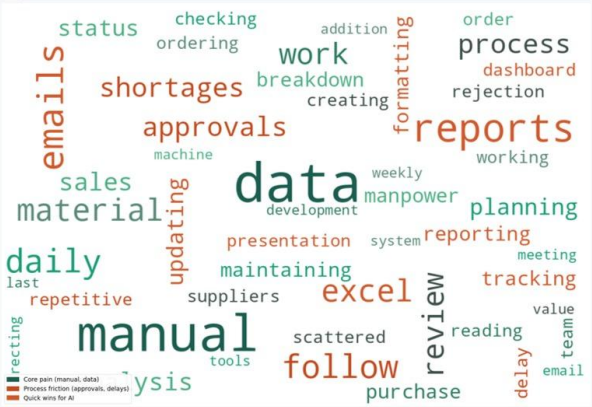

- P&S: strong process pain and good readiness—good candidate for reporting, approval, and document workflow pilots.
- CXO-led workflows: pain is high; use leadership-sponsored pilots to remove approval and reporting friction that cuts across teams.

Priority 2

- IT and O&M can act as enablement and adoption champions.
- HR & IR shows lower awareness; pair any pilot there with additional training and guardrails.

Where employees lose time and where can AI win it back

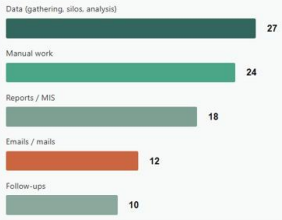

Top pain-points & quick-win automation opportunities

Top AI quick wins

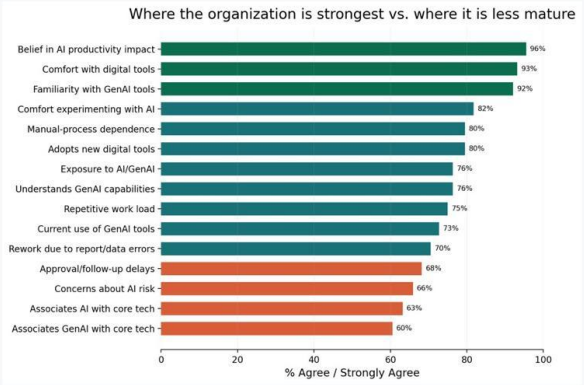

- Email writing and summarization
- Creating weekly/manual reports
- Dashboard consolidation
- Data entry and reconciliation

Pain by the numbers

The core gap is not belief; it is translation into everyday workflows

Strengths cluster around intent and digital comfort; weaker areas cluster around conceptual clarity, risks, and process bottlenecks

Management interpretation

What to lean into

- Very strong belief in AI productivity impact (96%).
- Digital-tool confidence is already high (93%).
- Experimentation comfort is strong enough to support pilots (82%).

What to fix

- Conceptual understanding of AI/GenAI is weaker than tool familiarity.
- Approval delays and data/report rework remain widespread.
- Risk concerns are high enough that governance must be visible from day one.

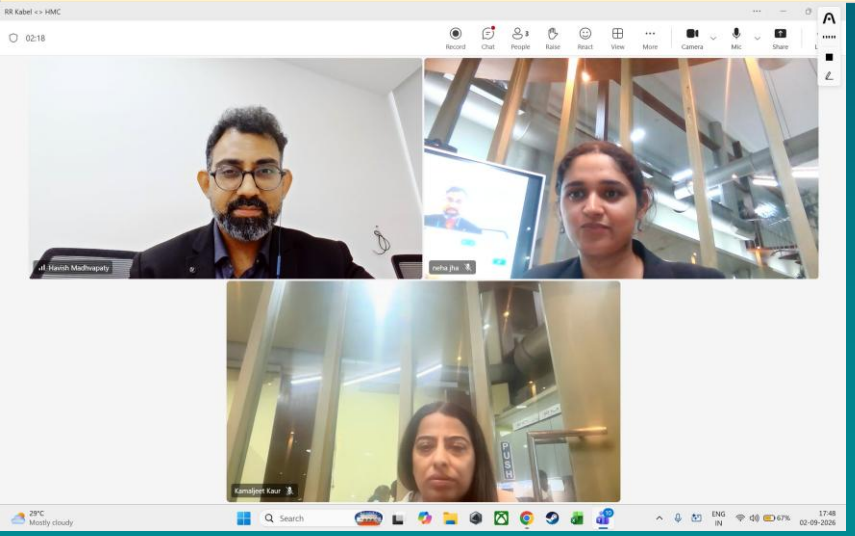

Havish M Consulting ©

HAVISH M CONSULTING

LEADERSHIP ONE-TO-ONE CALLS

One to One calls with Leaders to understand their needs.

Outcome:
Leadership alignment, faster decision-making, and top-down sponsorship.

Voices from the Business Leaders

Inputs gathered to shape our GenAI training and enable real business impact

Purpose of Training

Build practical GenAI capabilities to solve real business problems, improve productivity, and drive better decisions.

Carlos

IT / Systems / Digital Enablement

Key Expectations

- Understand what AI can do and what it cannot do
- Focus on backend capabilities
- No access to MCP
- Wishlist: Agent / OpenClaw to update data and files using templates (PPT, Excel)
- APIs and plugins (Excel, PPT)
- Reporting & summaries
- Using Fireflies in Teams to capture and compile action items
- Action items → Tracker in Microsoft Planner → Follow up

Mahesh

Finance / Planning / Investment

Key Expectations

- Monthly reports from SAP → Excel templates → Manual data entry → Charts
- Power BI dashboards
- Comments & remarks with analytics
- Board dashboards
- Scenarios & market updates (e.g., war, oil prices – impact on business)
- Alerts for currency, dollar, and oil price triggers
- Investment proposals: Need to validate assumptions using market information before decision-making

Roshan

IT / Integrations / Operational Excellence

Key Expectations

- Connect to Microsoft 365
- Leverage basic connectors, skills, and repositories
- SAP involves manual data and work
- Share best practices across the organization

Jignesh

Operations / Maintenance / Asset Reliability

Key Expectations

- Safety software: Record violations / breaches and trigger alerts to supervisors
- Autonomous AI for sensor + vibration monitoring
- X-ray images of pipes: ~1000 images/day reviewed by humans
- Need faster flagging (0.4 sec refresh rate). Focus on repeatability and reproducibility
- Maintenance software has too much data; action items are few. Need to detect genuine breakdowns outside normal range
- Make sense of numbers, remove bias, and improve productivity
- Reduce manual work, follow-ups, and data prep for management

Cross-Cutting Needs Across All Leaders

- Turn data into insights and better decisions
- Save time and reduce manual, repetitive work
- Ensure accuracy, trust, and governance
- Enable collaboration and action tracking across teams
- Monitor external factors and get proactive alerts
- Apply AI where decision-making and judgment matter

Key Takeaway

The leaders are looking for practical, reliable, and integrated AI solutions that help them work smarter, make faster and better decisions, and focus on high-value work. They want GenAI to handle **data, summarize, analyze, alert, and automate**—while humans focus on **judgment, strategy, and action.**

Our Role

Equip them with the skills, tools, and confidence to use GenAI effectively.

24 MONTH ADOPTION PLAN | 6 MONTH ROADMAP | AI MATURITY SPRINT

24-Month Adoption Plan

Define a long-term transformation blueprint covering capability building, use-case scaling, governance, and ROI realization. Structured across phases: pilot → scale → institutionalize.

Outcome:
Enterprise-wide roadmap aligned with business strategy.

6-Month Roadmap

Translate long-term strategy into near-term actionable initiatives with clear owners, milestones, and success metrics.

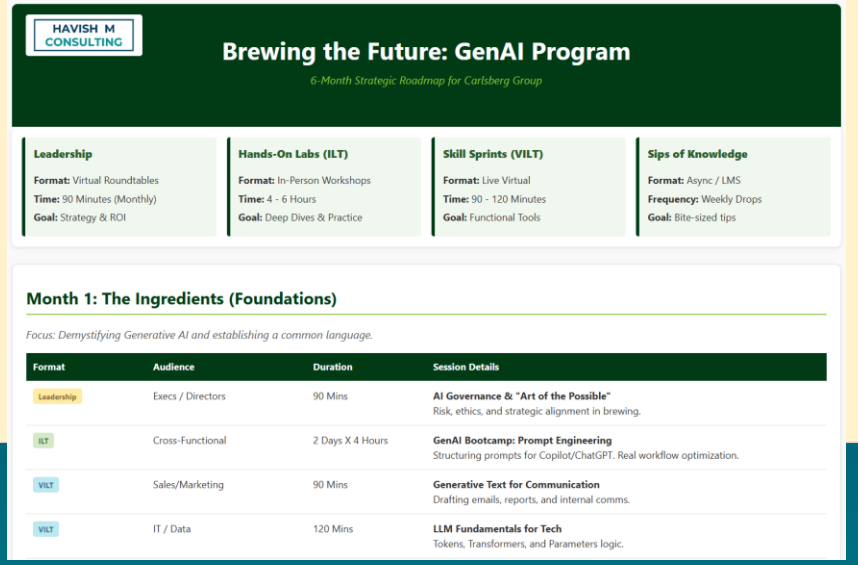

Outcome:
Quick wins + momentum creation.

Monthly Sprint

Adopt an agile execution model with monthly cycles focused on building, testing, and deploying use cases.

Outcome:
Continuous progress with measurable outputs every month.

HAVISH M CONSULTING

SAFETY FRAMEWORK

HMC ONE
AI STRATEGY. BUILT TO SCALE.

S.A.F.E.R.
AI FRAMEWORK

Responsible AI for Welspun WCL

A five-pillar framework for deploying GenAI tools responsibly across WCL operations — ensuring every AI interaction is Structured, Accurate, Fair, Ethical, and Resilient.

S — STRUCTURED

Governed Use

AI tools are deployed within defined workflows, approval chains, and usage policies. No ad-hoc or unsanctioned AI adoption.

A — ACCURATE

Verify Before You Trust

AI outputs are treated as drafts. Critical data — financials, contracts, specs — are validated by a human before action is taken.

F — FAIR

Bias Awareness

AI decisions impacting people — hiring, performance, vendor selection — are reviewed for bias and documented before implementation.

E — ETHICAL

Data & Privacy First

No confidential WCL data, IP, or customer information is entered into public AI tools. Internal data stays within approved boundaries.

R — RESILIENT

Human in the Loop

AI augments human judgement — it does not replace it. Escalation paths and fallback processes are defined for every AI-assisted workflow.

APPLIES TO

All WCL functions using AI tools — Sales, Procurement, Finance, Operations, and HR

KEY GUARDRAILS

No MNPI, pricing data, or third-party contracts in public AI. Always label AI-generated content before sharing

YOUR ROLE

Use AI as a thinking partner, not an authority. Own the output, question the logic, validate the facts

WCL COMMITMENT **AI at Welspun is a force multiplier — not a shortcut.** We adopt it with curiosity, deploy it with caution, and scale it with accountability.

Prepared by Havish M Consulting

HAVISH M CONSULTING

CUSTOMIZED ASSESSMENTS

Evaluate participant learning and application ability using real-world scenarios tailored to their roles.

Outcome:

Practical capability validation (not theoretical learning).

GenAI in Business – Scenario-Based Assessment

Context: Nuvoco Cement
Time: 10 minutes | Questions: 20

Questions

1.

The Nuvoco strategy team uploads the same quarterly performance report into ChatGPT and Claude to extract key risks and opportunities. Both tools produce different interpretations, confusing leadership.
Why is this difference most likely happening?

A. They connect to different internet servers
B. One model always uses a larger context window
C. Models sync with live market data differently
D. Their training data, reasoning styles, and alignment objectives differ

---

2.

A Nuvoco operations analyst wants accurate margin insights using plant-wise cost data. Previous vague prompts produced inconsistent outputs.
Which prompt strategy most reliably improves analytical accuracy?

A. Writing a structured role–task–context–format prompt
B. Requesting a "perfect answer"
C. Asking for a shorter output
D. Adding more adjectives and details

3.

While analysing clinker cost escalation, the finance team notices that open-ended AI prompts sometimes invent explanations. Step-by-step instructions significantly reduce this issue.
Why does this approach work?

A. It restricts creativity
B. It forces the model to search the internet
C. It guides the model through a logical reasoning process
D. It limits token usage

A. Summaries require a temperature above 1
B. PDFs cannot contain exception clauses
C. The model compresses lower-weight information during summarisation
D. The model automatically ignores small text

5.

Corporate teams at Nuvoco use Microsoft Copilot to analyse emails, Excel files, and internal presentations together. Productivity improves significantly.
Why is Copilot especially valuable for enterprise knowledge workers?

A. It never hallucinates
B. It produces longer answers than other models
C. It natively accesses and reasons over Microsoft 365 organisational data
D. It runs entirely offline

6.

The operations team analyses plant photos, production tables, and SOP documents together to identify efficiency gaps. Gemini performs better in this mixed-input workflow.
What is Gemini's biggest advantage here?

A. It can combine text, images, and tables into a single reasoning process
B. It connects directly to ERP systems
C. It guarantees audit readiness
D. It produces the most stylish writing

7.

The CEO asks for a "future-ready market expansion strategy" using GenAI, without providing data constraints or assumptions. The output sounds confident but unrealistic.
What MOST increases hallucination risk in this scenario?

A. Using a numbered list
B. Setting temperature to 0
C. Providing too much context
D. Asking for a future prediction without grounding facts

8.

Nuvoco's finance team is building a dealer loan eligibility logic inside ChatGPT. They want consistent,

Custom AI agents that automate workflows, execute multi-step tasks, and deliver business-ready outputs with minimal human intervention.

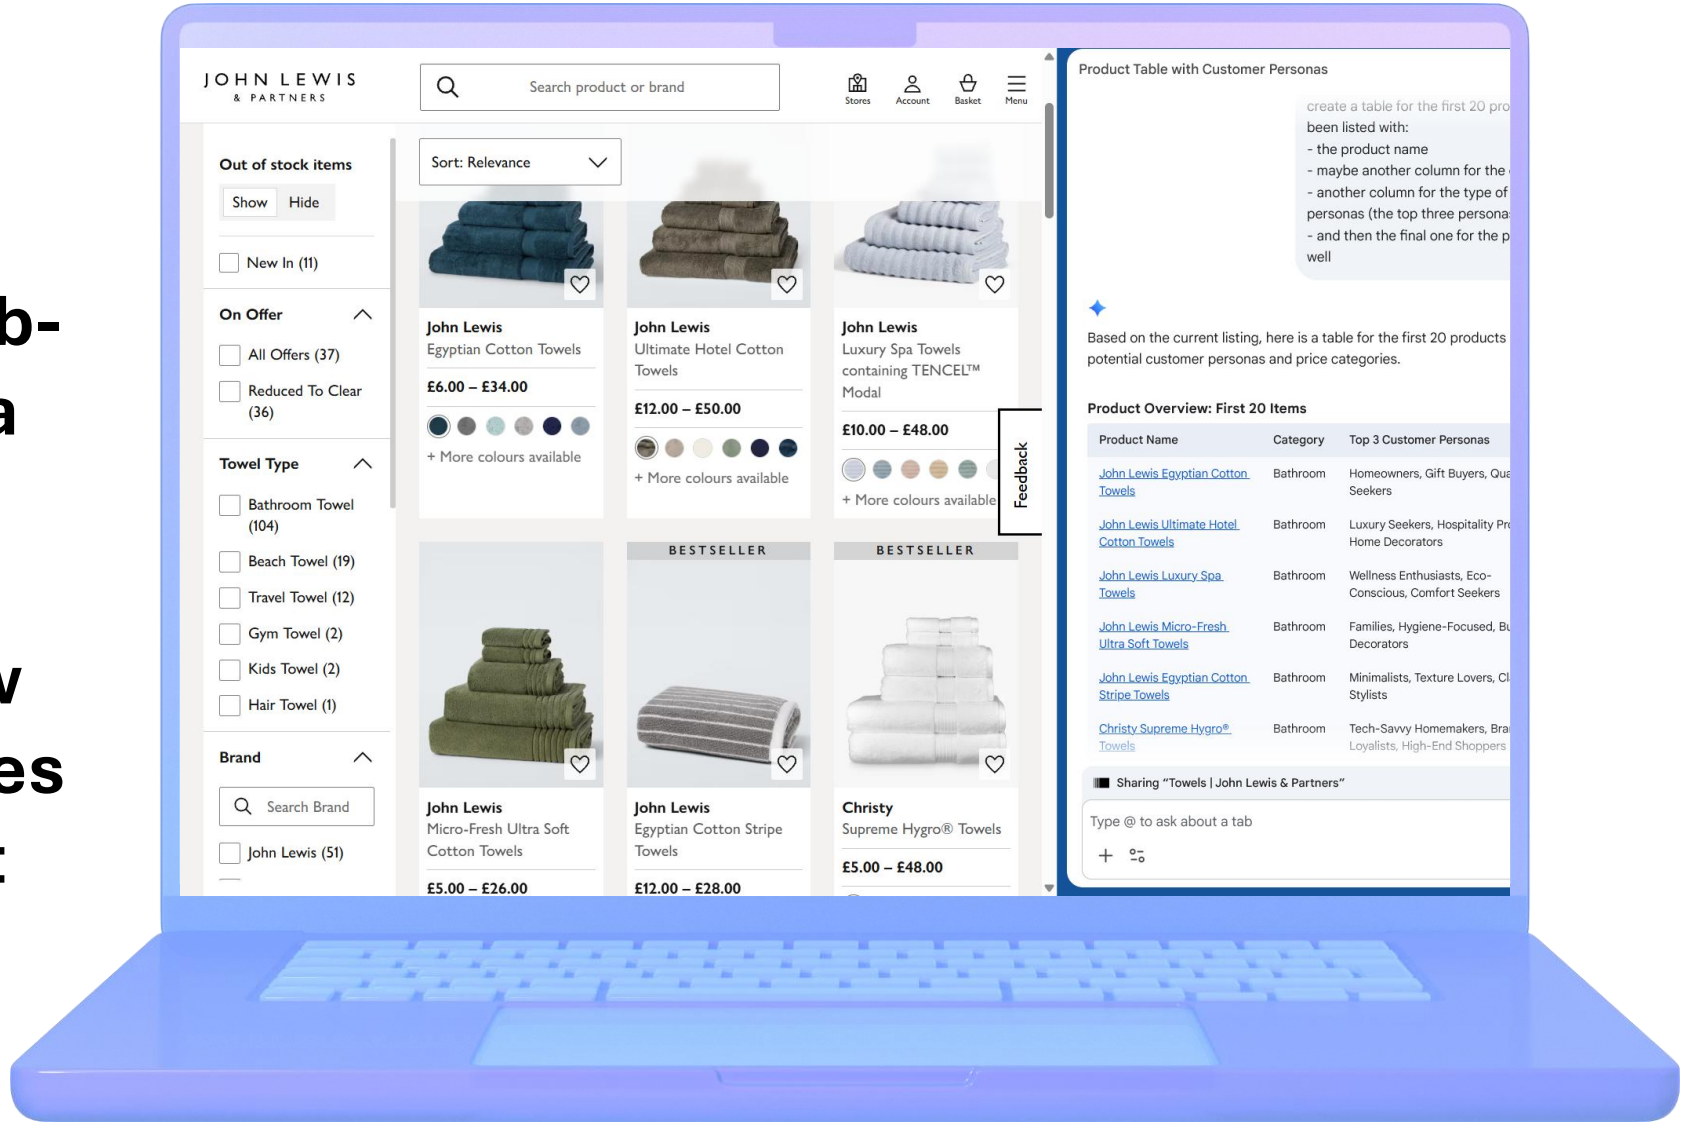

HMC ONE

AI STRATEGY. BUILT TO SCALE.

WEB AUTOMATION

Outcome:

Automates repetitive web-based tasks such as data extraction, form submissions, report generation, and workflow execution across websites and applications without manual effort.

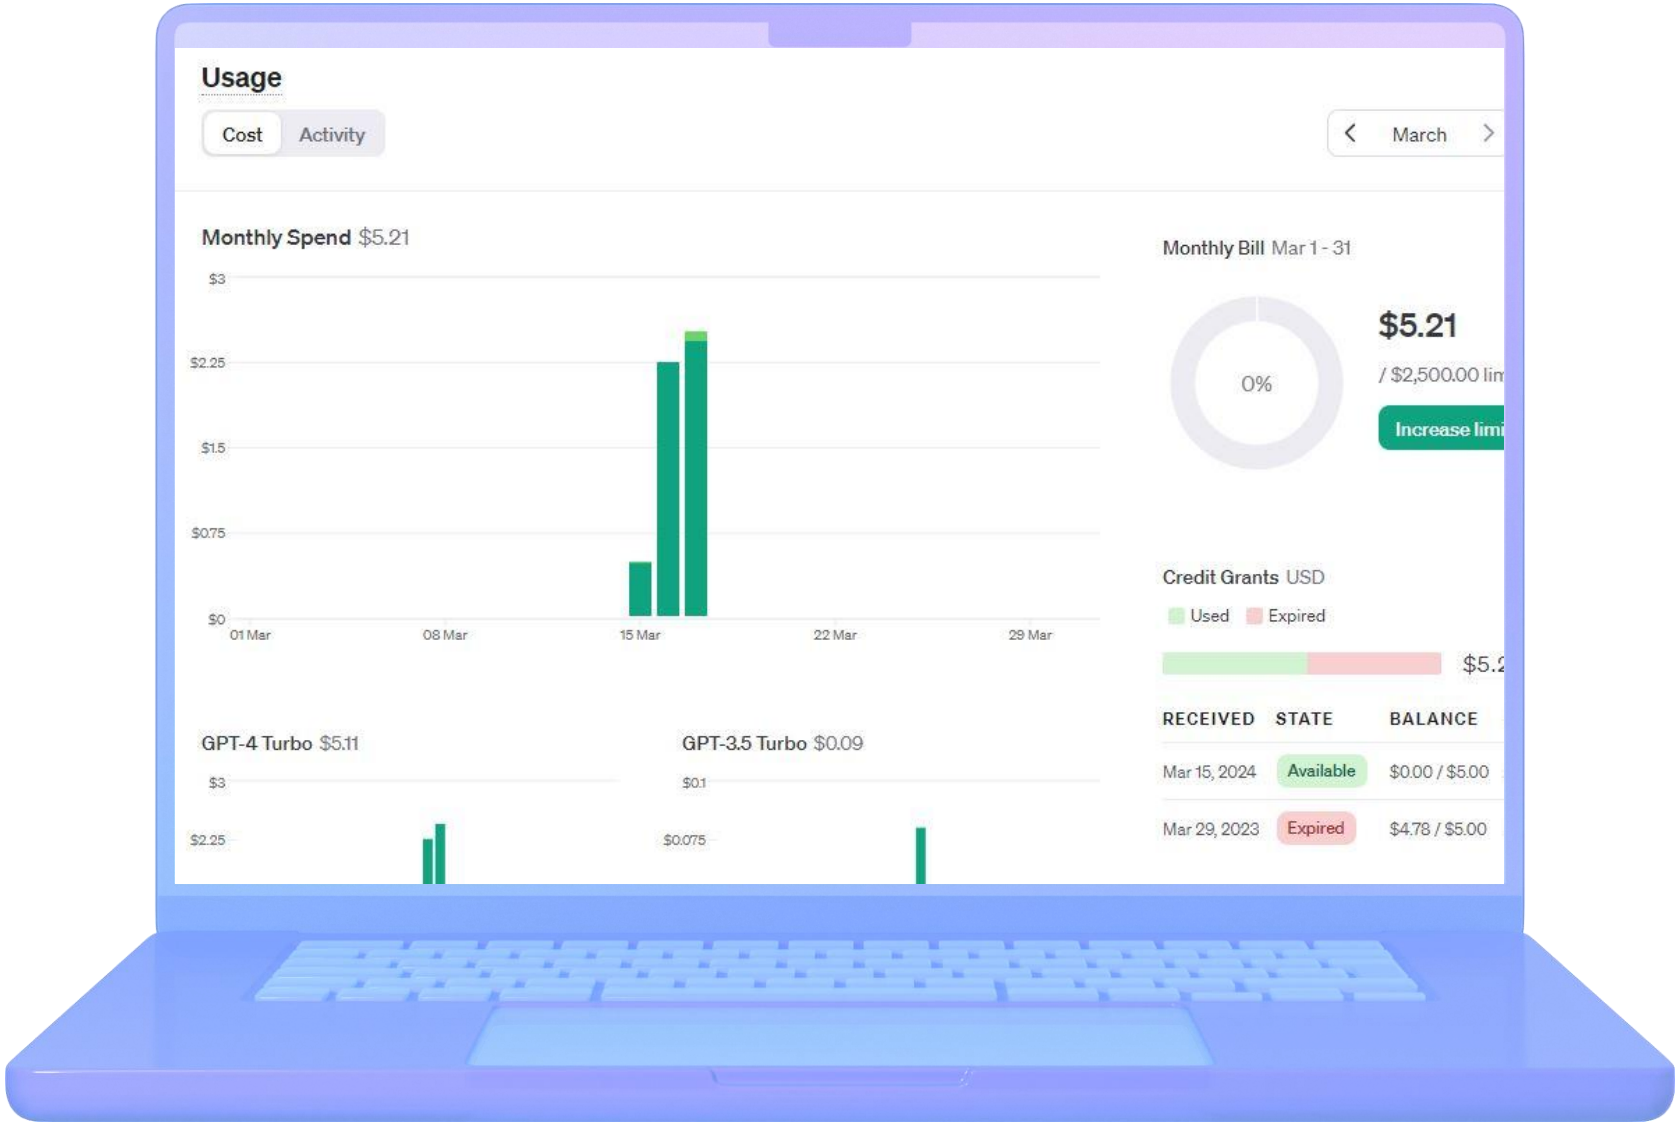

HMC ONE

AI STRATEGY. BUILT TO SCALE.

APIs

Outcome:

Seamless integration between platforms, enabling systems to exchange data, trigger actions, and power intelligent automation at scale.

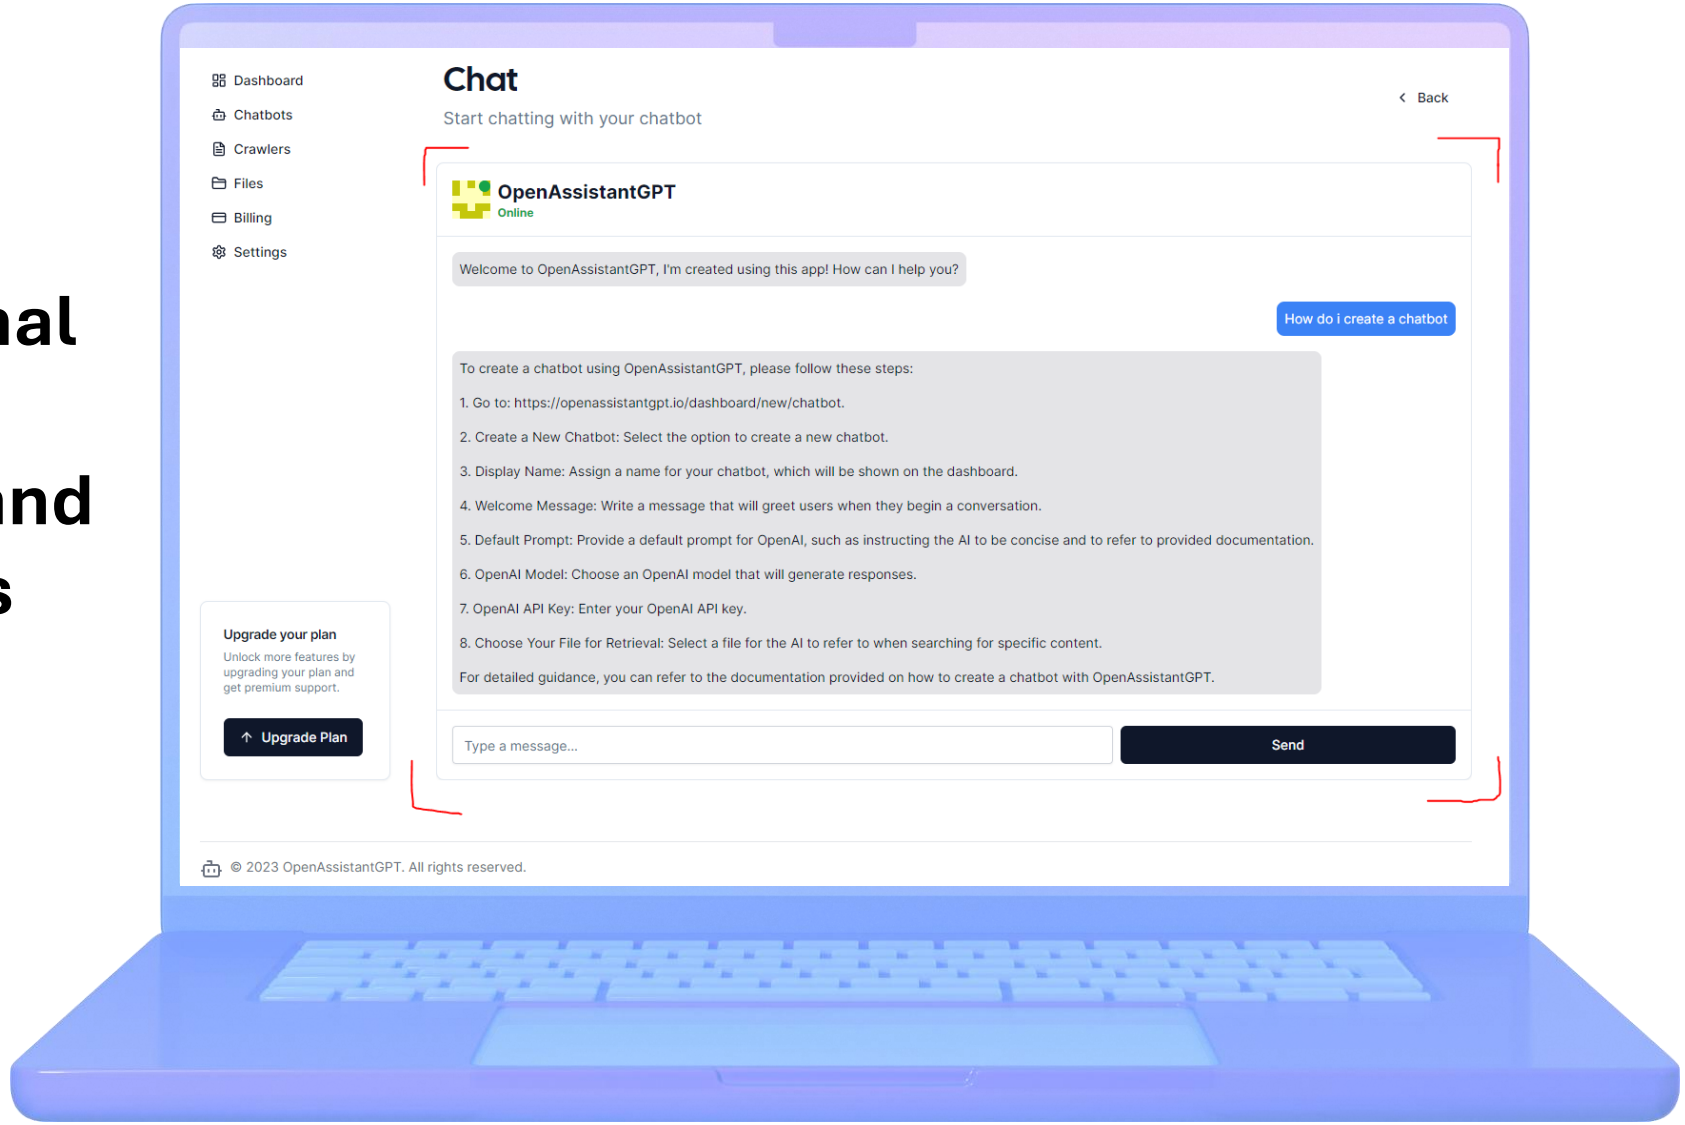

HMC ONE

AI STRATEGY. BUILT TO SCALE.

CHATBOTS

Outcome:

AI-powered conversational experiences that handle queries, support users, and drive engagement across customer and internal channels.

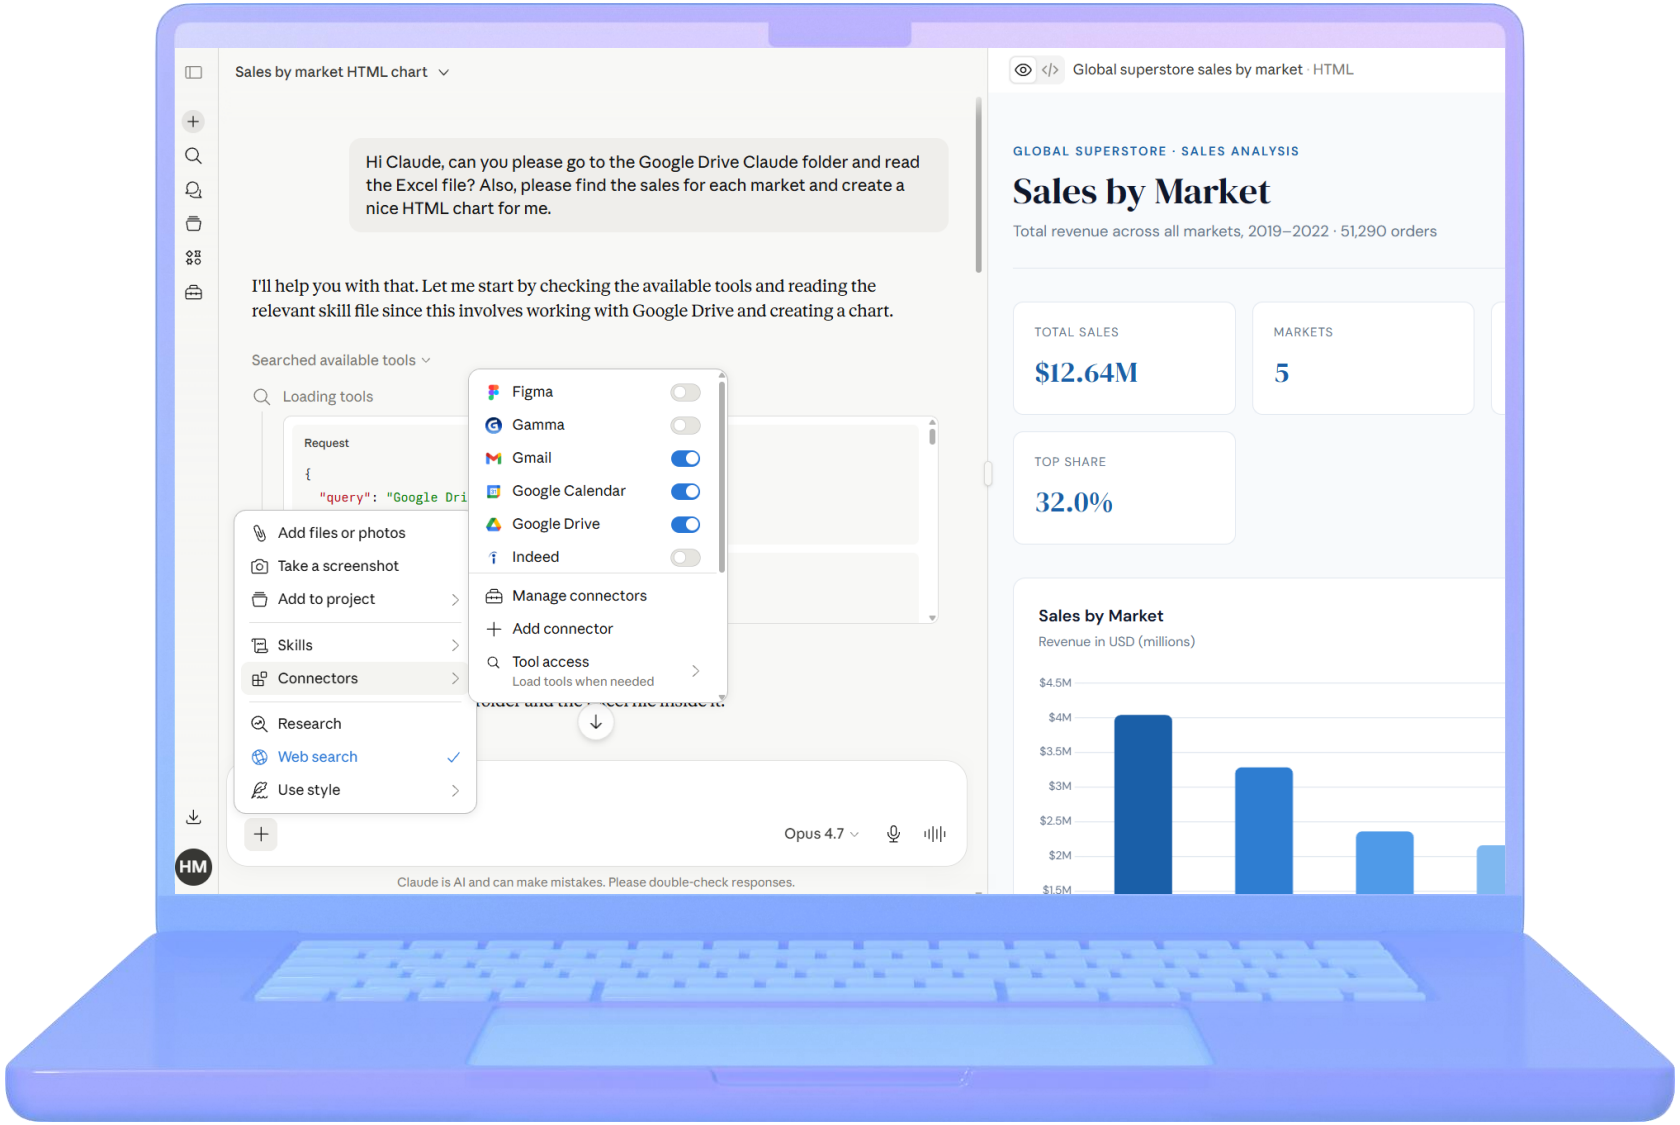

HMC ONE

AI STRATEGY. BUILT TO SCALE.

CONNECTORS

Outcome:

Unified access to enterprise data sources, enabling AI to retrieve, analyze, and act across systems in real time.

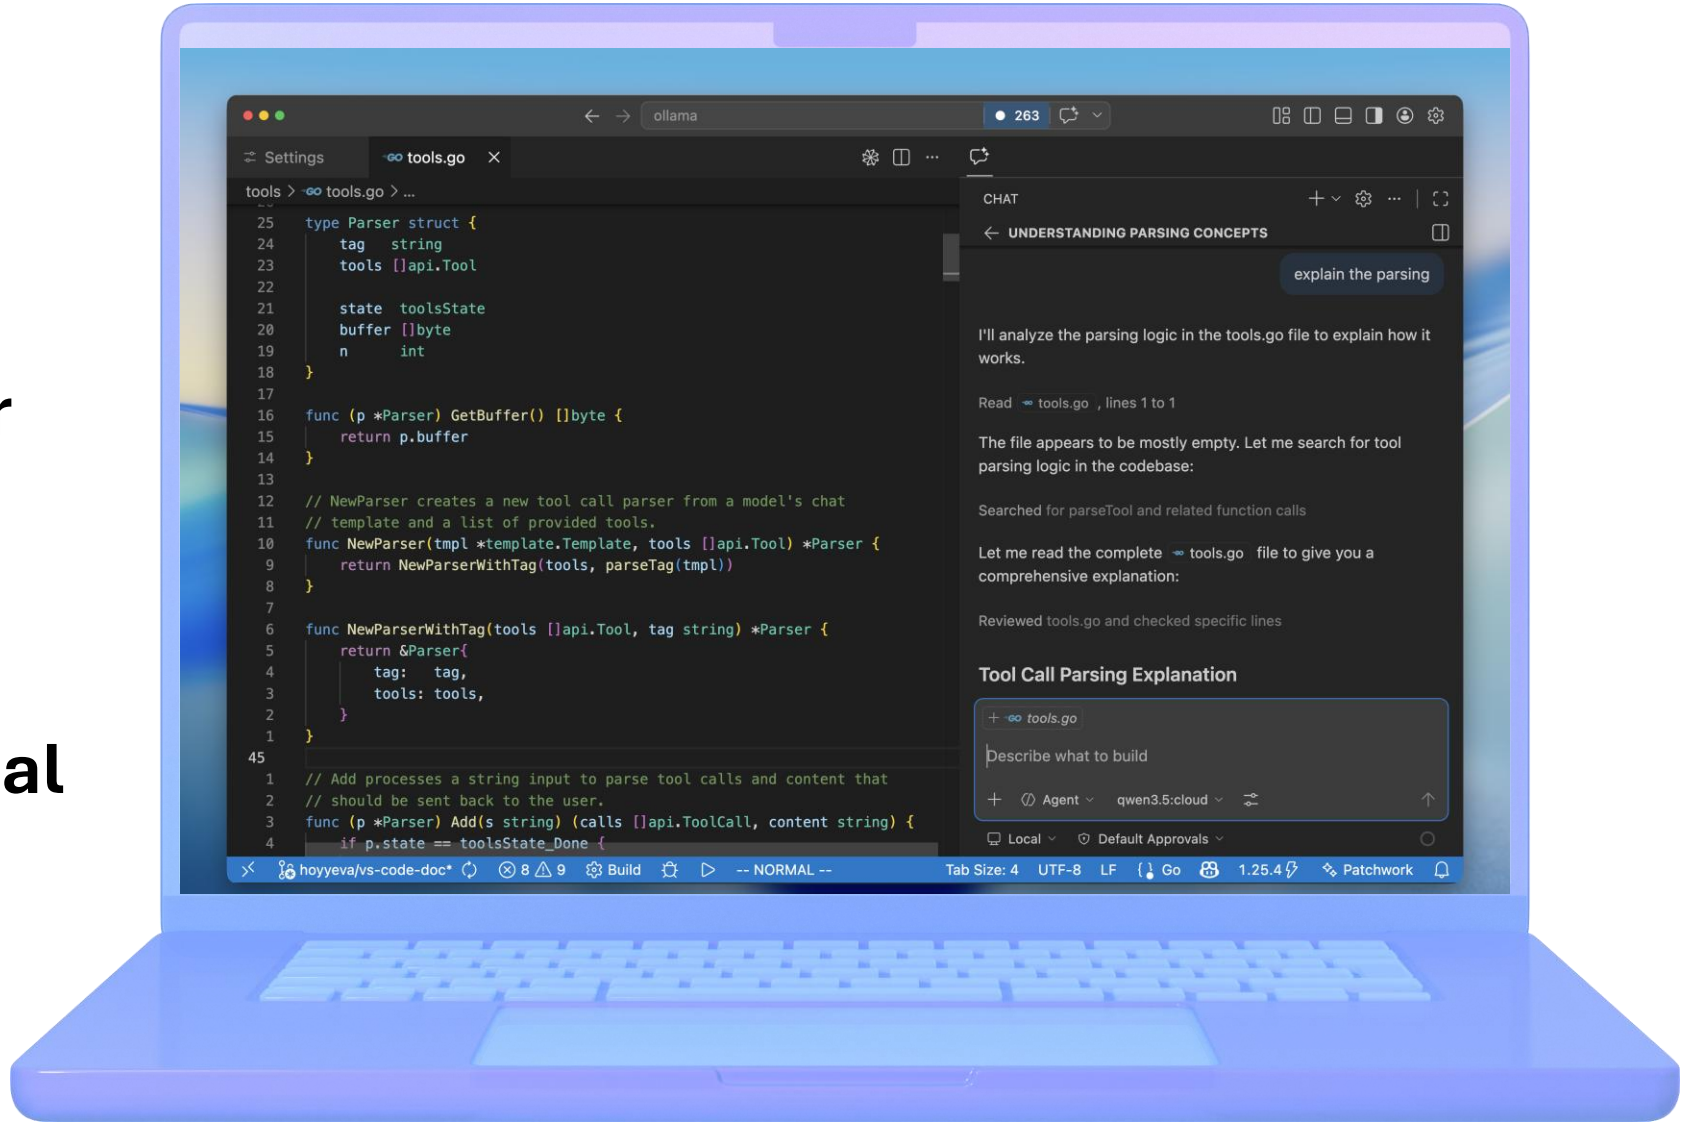

HMC ONE

AI STRATEGY. BUILT TO SCALE.

LOCAL LM MODELS

Outcome:

Private, on-premise AI deployments that deliver secure, low-latency intelligence without exposing sensitive enterprise data to external platforms.

HMC ONE

AI STRATEGY. BUILT TO SCALE.

NO-CODE ML

Outcome:

Build predictive models and data-driven insights without writing code, making machine learning accessible to business teams.

RR KABEL – PRODUCT BROCHURE CORP COMM

Detailed BOM – Low Voltage Armored Cable (95 sq.mm)

Note: 95 sq.mm refers to conductor cross-sectional area, not cable diameter.

Assumed configuration (draft)	
Conductor material	Copper
Voltage grade	0.6/1 kV
Insulation	XLPE
Armouring	Steel wire / strip
Core count	4-core

LME COPPER PRICING		
LME copper settlement	14,290.00	USD/tonne
USD/INR reference rate	95.256	INR/USD
Converted copper price	₹1,361.21	INR/kg
Theoretical copper weight	3.4048	kg/metre
Copper material cost	₹4,634.64	INR/metre
Price date	10-08-2026	Latest available

Item No.	Description	Qty	Unit	Basis	Remarks	Unit Rate (INR)	Amount (INR)
1	Copper conductor material – 4 × 95 sq.mm	3.4048	kg	Per cable metre	LME-linked theoretical copper weight	₹1,361.21	₹4,634.64
2	XLPE insulation compound	0.7500	kg	Budget allowance/metre	Estimated material weight	₹125.00	₹93.75
3	GI steel armour wire / strip	1.2000	kg	Budget allowance/metre	IS 3975 budget grade	₹70.00	₹84.00
4	PVC bedding and outer sheath compound	0.9000	kg	Budget allowance/metre	Estimated material weight	₹118.00	₹106.20
5	Double-compression brass cable gland	2.0000	pcs	Two cable ends	Budgetary market allowance	₹650.00	₹1,300.00
6	95 sq.mm copper cable lugs	8.0000	pcs	4 cores × 2 ends	Budgetary ₹34 per lug	₹34.00	₹272.00
7	LV heat-shrink termination kit	2.0000	sets	Two cable ends	4-core, 50–95 sq.mm	₹580.00	₹1,160.00
8	Testing and inspection	1.0000	lot	Per installed cable	Continuity and insulation resistance	₹1,500.00	₹1,500.00
					TOTAL ESTIMATED BOM		**₹9,150.59**

PRICING NOTES

Budgetary total is for one metre of cable plus two-end termination accessories and one testing lot. Material weights for XLPE, armour and PVC are allowances pending the approved RR Kabel datasheet and actual cable OD.

Rate sources: LME copper / Westmetall settlement; RBI exchange rate; IndiaMART listings for XLPE, PVC, armour wire, 95 sq.mm lugs and LV heat-shrink termination kits.

Excludes GST, freight, conductor conversion premium, manufacturing labour, overhead, wastage and supplier margin. Replace budget inputs in G14:G20 with quotations when available.

RR KABEL – PRODUCT BROCHURE CORP COMM

PROFIBUS DP TYPE A – 150 OHM

2x0.34 mm² • Shielded • Flame-Retardant PVC • Violet

High performance fieldbus cable for PROFIBUS DP applications.
Designed for reliable data transmission in industrial automation environments.

COMPLIANT WITH
- IEC 61158-2
- EN 50170
- PROFIBUS International
- RoHS Compliant

RoHS COMPLIANT

1 Data Conductors
2 × Class 1 solid bare annealed copper, nominal 0.64 mm diameter

2 Core Insulation
Foam-skin polyethylene, red core and green core, nominal 2.5 mm OD

3 Pair Separator
PET separator tape over twisted pair

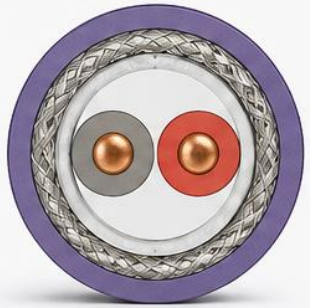

4 Bedding / Inner Layer
FR-PVC bedding, assumed 6.0 mm OD over insulated pair

5 Primary Screen
Aluminium/polyester laminated tape, 100% coverage

6 Secondary Screen
Tinned copper wire braid, minimum 60% optical coverage

7 Outer Sheath
Flame-retardant PVC, violet, finished OD 7.9 mm nominal

Cross Section (Not to Scale)

TECHNICAL DATA

Characteristic Impedance	150 ± 15 Ω (at 3 – 20 MHz)
Conductor Diameter	0.64 mm (solid)
Conductor Resistance	≤ 57.5 Ω/km (20°C)
Insulation Diameter	2.5 mm nominal
Finished Outer Diameter	7.9 mm nominal
Operating Temperature	–30°C to +70°C
Min. Bending Radius (Static)	8 × OD (≈ 63 mm)
Flame Retardant	IEC 60332-1-2
Voltage Rating	250 V
Capacitance (Nominal)	≤ 60 pF/m (800 Hz)

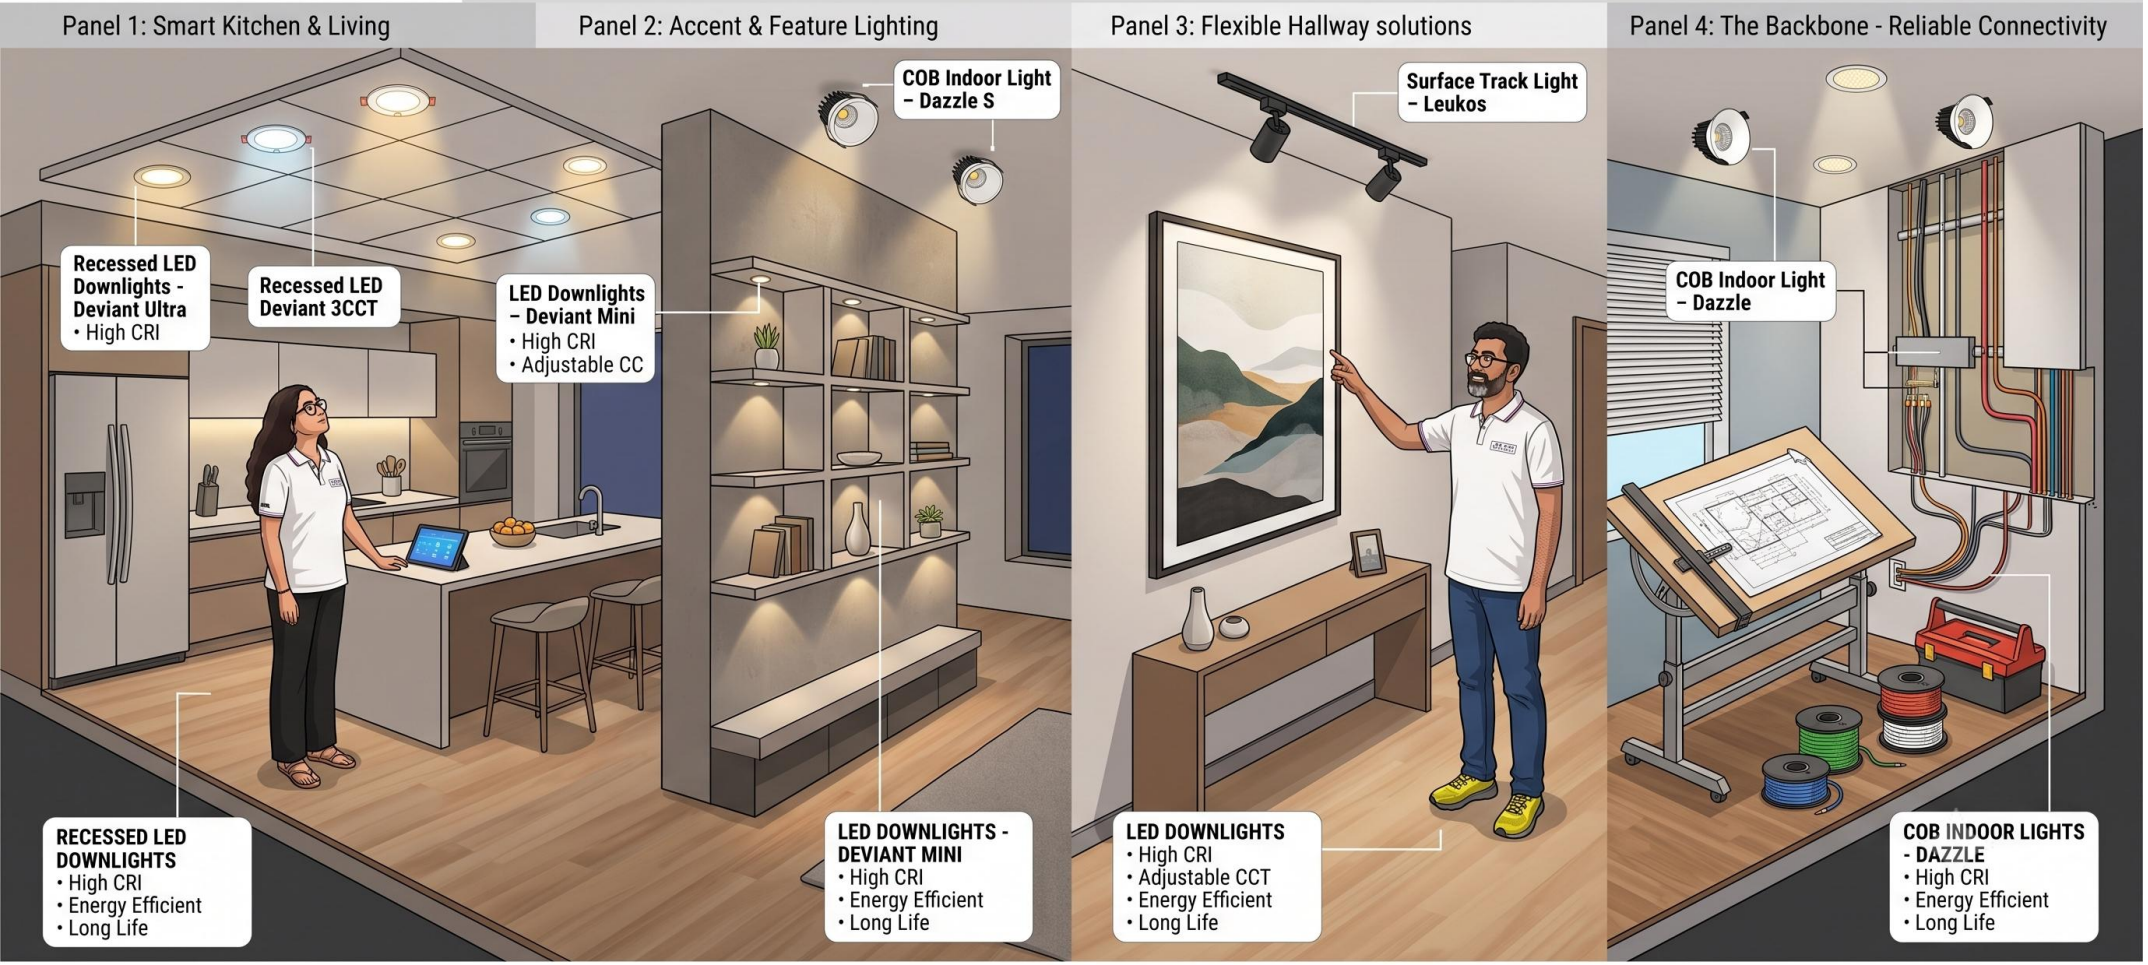

Packaging: 100 m Wooden Reel

RR KABEL – SALES AGENT

more details about flamex

Agent Builder

Reasoning completed in 5 steps

Assuming you mean **RR Kabel FLAMEX FR-LSH**, it is a **flame-retardant, low-smoke, low-halogen building wire**—not a fire-survival cable.

- **Use:** Fixed/protected wiring in conduits, especially hospitals, schools, theatres, commercial complexes, chemical plants, and densely occupied areas.
- **Safety benefit:** Restricts flame spread and emits substantially less smoke and acid gas than conventional PVC wire, improving visibility during evacuation.
- **Voltage grade:** Up to **1100 V**
- **Conductor:** Multi-strand electrolytic copper
- **Insulation:** FR-LSH compound conforming to **IS 5831 Type A/D**, rated **70°C**
- **Approvals: IS 694**, FIA /TAC
- **Typical sizes/current ratings:** 1 sq mm—14 A;

ALTIUS – PAYROLL COMPOSITION CALCULATOR

HMC ONE
AI STRATEGY. BUILT TO SCALE.

LANDMARK – SLA GUIDELINES AND CUSTOMER NPS

1

The delivery was technically on time as per the promised date, but I was expecting it earlier based on similar past orders. The packaging was slightly dented, which made me worried about the product condition. Thankfully the product was fine, but the experience didn't feel premium. Overall, acceptable but not impressive.

2

I really liked the product quality and it matched the description quite well. However, the delivery updates were confusing and kept changing on the app. Even though it arrived within the SLA window, the lack of clarity made it stressful. Better communication would improve the experience.

3

The order arrived on time, but the delivery executive seemed rushed and didn't handle the package carefully. The box looked slightly open when I received it. The product inside was okay, but this made me question quality control. Not sure if I would fully trust future orders.

4

Shopping experience on the website was smooth and checkout was easy. However, I found the same product cheaper on another platform right after ordering. Delivery was on time, so no complaints there. Pricing competitiveness is something you should work on.

5

The product quality was average and not exactly what I expected from the images shown online. Delivery was within SLA, but I had expected faster shipping given my location. The return process also seemed slightly complicated. Overall, a mixed experience.

6

I faced issues with the app crashing while placing the order, which was frustrating. Eventually, I managed to place it, and delivery happened on time. The product itself is good and meets expectations. Fixing app stability would make a big difference.

7

Delivery took the full promised timeline, but I personally felt it was slow compared to other platforms. The product was fine and well-packaged. There were no major issues, but nothing stood out positively either. It felt

1. Delivery SLA
Standard Delivery: 2–5 business days (metro), 4–7 days (non-metro)
Same/Next Day (where applicable): clearly communicated and guaranteed
Customer perception gap risk: Even if SLA met, expectations may be shorter due to competitors

2. Order Communication SLA
Order confirmation: Instant
Dispatch update: Within 12–24 hours
Delivery tracking updates: Real-time / near real-time
Delay notification: Proactive before SLA breach

3. Customer Support SLA
First response time: < 2 hours (chat), < 24 hours (email)
Resolution time: 24–72 hours depending on issue
Escalation visibility: Clear tracking for customer

4. Return & Refund SLA
Return pickup: Within 2–3 days of request
Refund processing: 5–7 business days
Replacement delivery: Same as fresh order SLA

5. Product Quality SLA
Zero tolerance for:
Damaged items
Wrong items
Packaging standards:
Tamper-proof
Damage-resistant

6. Experience SLAs (Often Missed but Critical)
App/website uptime: > 99%
Page load time: < 3 seconds
Checkout success rate: > 95%

LANDMARK – SLA GUIDELINES AND CUSTOMER NPS

HMC ONE
AI STRATEGY. BUILT TO SCALE.

Summary | Comment Analysis | SLA Scorecard | Recommendations

FEEDBACK VS SLA — EXECUTIVE SUMMARY

15 comments

SLA MET (DELIVERY)
13 / 15
Delivery within promised window

PERCEPTION GAPS
8 / 15
Met SLA but felt slow / unsatisfactory

SLA BREACHED
2 / 15
Delay or wrong item dispatched

COMMUNICATION ISSUES
4 / 15
Tracking, delay alerts, support lag

PRODUCT QUALITY ISSUES
4 / 15
Wrong color, dented pack, mismatch

APP / TECH ISSUES
2 / 15
Crash, tracking not real-time

KEY TAKEAWAY

Landmark is largely **meeting its delivery SLA** (13/15 comments confirm on-time delivery), but a significant share of customers **still feel dissatisfied**. The root cause is a *perception gap* — competitor benchmarks have raised expectations beyond Landmark's SLA window. Additionally, **communication, app reliability, and product representation** are recurring failure points that hurt overall experience even when delivery is technically on time.

Summary | Comment Analysis | SLA Scorecard | Recommendations

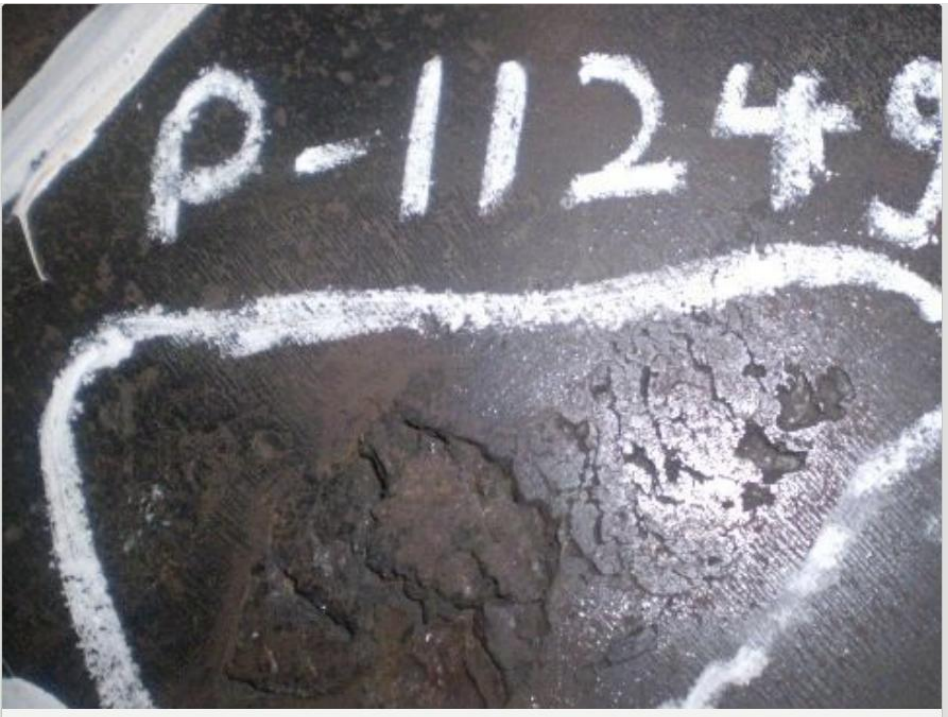

INDIVIDUAL COMMENT — SLA MAPPING

15 entries

#	SLA DIMENSION	STATUS	CUSTOMER OBSERVATION	SLA IMPLICATION
1	Delivery SLA	Met — Perception Gap	On time per promise, but expected earlier. Dented packaging caused concern.	SLA technically met; packaging standard (tamper-proof/damage-resistant) violated.
2	Communication SLA	Partial Breach	Delivery updates on app kept changing; confusing despite on-time arrival.	Real-time tracking SLA not met — misleading updates caused unnecessary stress.
3	Product Quality SLA	Partial Breach	Package appeared slightly open; delivery agent rushed and careless.	Packaging integrity (tamper-proof standard) at risk. Zero-tolerance SLA may be breached.
4	Delivery SLA	Met	Delivery on time. Pricing found cheaper elsewhere after ordering.	Delivery SLA met. Issue is commercial/pricing — outside SLA scope.
5	Product Quality SLA	Perception Gap	Product below expectations vs online images; return process felt complicated.	Product representation gap. Return pickup SLA (2–3 days) perceived as complex.
6	App / Tech SLA	Breach	App crashed during order placement; eventually placed, delivery on time.	App uptime SLA (>99%) and checkout success rate (>95%) breached.
7	Delivery SLA	Met — Perception Gap	Full timeline used but felt slow vs competitors. Average experience.	SLA met. Competitor expectation gap — customers benchmark against faster platforms.

WELSPUN – DEFECT RECOGNITION

PARENT METAL

Rolled-in Scale

REPAIRABLE

Old oxide from a previous heating, pressed into the surface.

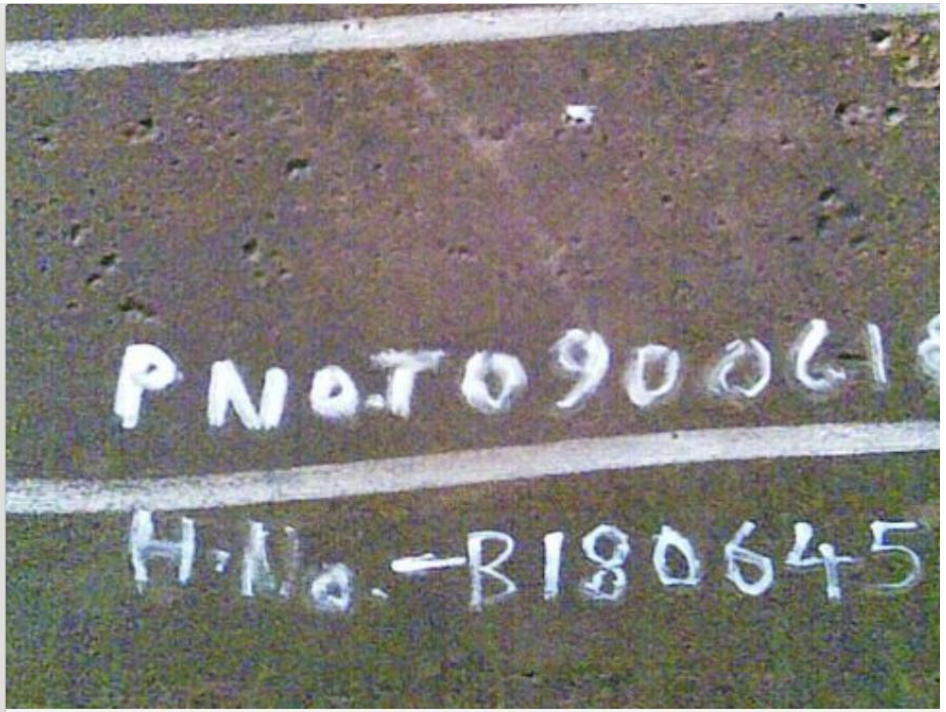

DEFINITION

Local areas of scale formed during a previous heating, which were not removed during rolling and got pressed into the surface of the stock.

SPOT IT BY

- Flat dark patch or streak sitting slightly below the surface
- Darker colour than the steel around it, from the oxide

+ CAUSES, DISPOSITION AND LOOK-ALIKES

PARENT METAL

Pitting

REPAIRABLE

Small hollows scattered at random. Base metal not exposed.

DEFINITION

Randomly spaced small depressions in the cured film. Pitting is similar to pin-holing, except that pits do not expose the bare substrate.

SPOT IT BY

- Many small round hollows, spaced without a pattern
- No bare metal showing at the bottom of the pit

+ CAUSES, DISPOSITION AND LOOK-ALIKES
